

EZEQUIEL D. PITY

Senior Cloud Infrastructure Architect | Automation & AI Data Center Infrastructure

Tomball, TX 77375 | [linkedin.com/in/ezequielpitty](https://www.linkedin.com/in/ezequielpitty)

PROFESSIONAL SUMMARY

Senior Cloud Infrastructure Architect and Automation Leader with more than 20 years of experience designing, automating, modernizing, and operating enterprise infrastructure for Fortune 500 organizations. Proven expertise across AWS, Azure, Google Cloud, Terraform, Ansible Automation Platform, CloudFormation, VMware, Linux, DevOps, and infrastructure security. Experienced leading cloud migrations, infrastructure modernization programs, large-scale automation initiatives, and AI data center infrastructure deployments. Bilingual in English and Spanish, with a strong record of mentoring teams, advising clients, and delivering secure, scalable, and repeatable technology solutions.

CORE COMPETENCIES

Cloud Architecture • Infrastructure as Code • Automation Strategy • AI Data Center Infrastructure • DevOps & CI/CD • Hybrid Cloud • Linux & Windows Engineering • VMware • Security & Compliance • Technical Leadership • Client Consulting • Team Mentoring

PROFESSIONAL EXPERIENCE

Kyndryl, Inc. | Houston, Texas | August 2021 – Present

Senior Lead, IT Cloud Consulting Group

- Serve as a Senior Lead Cloud Consultant, advising enterprise clients on cloud modernization, infrastructure automation, DevOps transformation, and Infrastructure as Code strategies across hybrid and multi-cloud environments.
- Design and implement enterprise automation solutions using Ansible Automation Platform, Terraform, CloudFormation, Jenkins, Git, Azure DevOps, and VMware to enable consistent, scalable, and repeatable infrastructure deployments.
- Lead the development of Infrastructure as Code solutions for Microsoft Azure and AWS, automating virtual machines, networking, load balancers, secrets management, storage, and cloud-native services.
- Develop reusable Ansible playbooks, Terraform modules, and CloudFormation templates that standardize provisioning, reduce manual configuration, and improve operational efficiency.
- Partner with enterprise customers to optimize cloud operations, strengthen security posture, and implement automation practices aligned with architecture, reliability, and compliance requirements.

Google AI Data Center NAC Project – Lead Infrastructure Engineer | Buffalo, NY - Present

- Assigned as a Lead Infrastructure Engineer supporting the deployment of next-generation Google AI data center infrastructure.
- Support the installation, validation, troubleshooting, and commissioning of Google Ironwood TPU infrastructure designed for hyperscale artificial intelligence and machine learning workloads.
- Coordinate rack-scale infrastructure deployment activities involving TPU systems, networking components, cooling assemblies, and supporting hardware within a mission-critical data center environment.
- Perform infrastructure readiness verification, hardware validation, quality inspections, operational testing, and ticket-based troubleshooting while following strict safety, quality, and engineering procedures.
- Collaborate with multidisciplinary engineering and operations teams to execute standardized deployment procedures and maintain accurate technical documentation and operational compliance.

Infrastructure Automation Engineer

- Transitioned from IBM Global Technology Services to Kyndryl as part of the infrastructure automation organization.
- Led UNIX/Linux optimization and infrastructure deployment initiatives focused on resilient, scalable, and repeatable solutions.
- Designed and implemented VMware-based cloud infrastructure to improve reliability and operational performance.
- Built CI/CD pipelines with Jenkins and Git and led Terraform provisioning initiatives to standardize enterprise deployments.
- Automated network infrastructure builds and configuration through Ansible Tower, reducing manual administration effort.

- Implemented operating system hardening and supported PCI-DSS compliance requirements.

IBM | Houston, Texas | September 2019 – August 2021

Infrastructure Automation Engineer

- Managed UNIX/Linux optimization and high-availability infrastructure deployments across virtualization and clustered environments.
- Developed server-build automation using Ansible, Terraform, and CloudFormation for multiple enterprise clients.
- Converted Puppet manifests into Ansible playbooks for a Red Hat initiative, improving automation consistency and maintainability.
- Implemented Red Hat Virtualization and VMware infrastructure solutions and performed root cause analysis for complex platform issues.
- Developed Azure DevOps pipeline integrations and standardized infrastructure provisioning through Terraform Cloud.
- Architected CloudFormation templates for AWS application stacks, auto scaling, and migration programs.

Infosys – Mercedes-Benz USA | Atlanta, Georgia | July 2018 – September 2019

Principal Cloud Infrastructure Engineer

- Led a team of 12 infrastructure and DevOps engineers through the redesign and migration of enterprise DevOps platforms to AWS.
- Directed the migration of Mercedes-Benz USA web properties from regional data centers to AWS Cloud.
- Eliminated single points of failure and improved platform availability through infrastructure redesign and automation.
- Created Ansible playbooks and Terraform modules for repeatable cloud infrastructure deployment.
- Migrated Adobe Experience Manager environments while maintaining uninterrupted production availability.

JPMorgan Chase & Co. | Houston, Texas | January 2018 – July 2018

Vice President, Infrastructure Engineering

- Supported the Global Technology Infrastructure Web Hosting Services organization within the Configuration Management and Automation team.
- Developed enterprise automation toolsets using Ansible and Puppet to standardize infrastructure and application deployment.

Sysco Foods / 2nd Watch | Houston, Texas | June 2015 – January 2018

Senior Cloud Engineer

- Designed resilient and scalable Infrastructure as Code solutions using IaaS, PaaS, and SaaS delivery models.
- Automated AWS services with Terraform and CloudFormation, including EC2, RDS, Auto Scaling, security groups, load balancers, Route 53, and VPCs.
- Configured web application firewall nodes and supported network security and traffic inspection requirements.
- Led data center migrations to AWS and developed custom Puppet modules for Windows and Linux environments.

The Home Depot | Houston, Texas | April 2014 – June 2015

Senior Systems Engineer / Infrastructure Automation Lead

- Deployed Puppet Enterprise for configuration management and developed reusable automation modules.
- Provided cloud data center design and consulting and configured AWS Direct Connect connectivity.
- Automated Nagios monitoring, server infrastructure, and application builds using PowerShell.
- Scaled infrastructure automation across thousands of nodes and mentored newly hired engineers.

Consumer Media Network, LLC | Houston, Texas | October 2010 – April 2014

IT Manager

- Managed enterprise networks, remote offices, websites, projects, employees, contractors, and a growing multi-site user base.
- Administered F5 firewalls, Cisco routing and switching, DNS, VMware ESXi clusters, server clustering, load balancing, and email infrastructure.
- Improved hosting, security, infrastructure reliability, and operational processes across multiple cloud providers.

Hewlett-Packard | Houston, Texas | March 2007 – October 2010

L2/L3 Infrastructure, Hosting, Linux, Windows, VMware, Citrix & Network Operations Support

- Provided enterprise administration, troubleshooting, and operational support for Windows, Linux, VMware, web hosting, Active Directory, Citrix, and Tidal Enterprise Scheduler environments.
- Supported Network Operations Bridge and Integrated Command Center functions while implementing ITIL and ITSM practices.

Global Custom Commerce, Inc. | Houston, Texas | January 2006 – March 2007

Network Administrator

- Administered Cisco networks, firewalls, servers, desktop systems, telephony, backups, and performance monitoring.

Macropixels, Inc. | Houston, Texas | July 2001 – January 2006

Owner / IT Services Consultant

- Provided managed infrastructure, web hosting, website development, backup, network, and systems administration services to small and midsize clients.

Houston Interweb, Inc. | Houston, Texas | January 1998 – July 2001

Network Administrator / Web Developer

- Managed office networks and systems, developed client websites, and prepared digital media for web publishing.

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform, VMware, IBM SoftLayer

Infrastructure as Code & Automation: Terraform, Terraform Cloud/Enterprise, Ansible, Ansible Automation Platform, CloudFormation, Puppet, PowerShell

DevOps & CI/CD: Jenkins, Git, Azure DevOps, Docker, Kubernetes

Operating Systems: Red Hat Enterprise Linux, CentOS, SUSE, Ubuntu, Debian, Windows Server, macOS

Databases: MySQL, Microsoft SQL Server, Amazon Aurora, DynamoDB, Oracle

Networking & Security: Cisco routing and switching, F5, Cisco ASA/PIX, Barracuda, SonicWall, WAF, DNS, load balancing, OS hardening, PCI-DSS

Web & Middleware: Apache, Nginx, Tomcat, IIS, Adobe Experience Manager

Backup & Recovery: Veritas Backup Exec, Veeam, Commvault

CERTIFICATIONS

- Red Hat Delivery Specialist – RHEL Network (2020)
- Google Cloud Platform Fundamentals: Core Infrastructure (2020)
- AWS Certified SysOps Administrator – Associate (2020)
- AWS Certified Solutions Architect – Associate (2020)
- AWS Certified Cloud Practitioner (2020)
- Cisco CCNP (2010) | Cisco CCNA (2009) | Microsoft Certified Professional (2000) | CompTIA A+ (2001)

EDUCATION

- Capella University – Information Technology, Network Specialization (2010–2011)
- North Harris College – Computer Information Systems (1991–1993)
- University of Panama – Business Administration & Accounting (1988–1989)
